

Advisement to Parents Regarding Child's Library Use

In the interest of promoting equal access to all, please be advised that the Leonia Public Library does not limit your child's access to information and materials.

The parent/guardian signing their child's library card application understands that the library does not restrict:

- Materials or information available from the Leonia Library or any libraries in the Bergen County Cooperative Library System;
- Information obtained from online library databases;
- Internet access, which is unfiltered.

The Library staff urges parents/guardians to talk to their children about the materials the children are borrowing from the Library. In addition, parents/guardians should establish acceptable use of the Internet at the Library with their children.

The staff at the Leonia Public library will, *to the best of their ability*, interrupt Internet use that appears to be illegal or that would be considered obscene, objectionable or dangerous. The Library cannot be responsible for minors accessing content that may be considered objectionable to an individual family's standards.

As in the past, children and adults wishing to use the library's computers for Internet access must present a library card. However, as of March 1, 2010, internet permission stickers for minors will no longer be required.

The Leonia Library Board of Trustees
